

Anticimex Smart Box

Smart Box is a multi-catch unit that deals with rodents above ground. Attractants lure the rodent into the box, exterminating it efficiently and without any toxics.

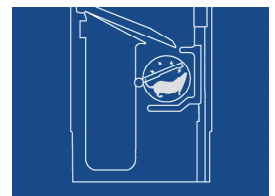

When the rodent enters the trap, sensors detect movement and body heat. A catch function is activated, immediately killing the rodent with an electrical current. The rodent is deposited into a plastic bag in a closed container. The trap is then automatically reset and ready for action again. No toxic bait is used. Smart Box constantly reports back to our Smart data hub, informing us of any activity and catches. The Smart Box comes in different models. For outdoor usage we recommend Smart Box with solar panel.

Anticimex Smart

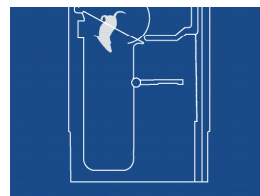

Anticimex Smart is an intelligent system that keeps an eye on things you don't want to see. By constantly monitoring and instantly reacting, it prevents costly infestations in an environmentally-friendly way. Add the services traditionally provided by us, and you will get a solution that gives you the best of two worlds – automation and expertise.

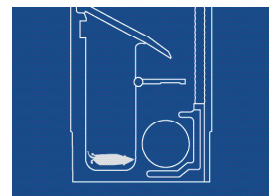

1 – A rodent enters the trap and the trap is activated.

2 – The elevator lifts the rodent upwards where it receives an electric charge.

3 – The elevator deposits the rodent into a bin.

4 – The elevator returns to its start position, ready for another catch.

Smart Box

Controls	Electronic control with GPRS data transfer to sms, email and Smart data hub.
Sensors	2 PIR sensor for rodent activity 1 water level sensor for security
Power supply	12V/5Ah rechargeable battery or standard 230 V socket. Battery version can also be used together with solar panel.
Density class	IP 44
Certified by	Umweltbundesamt (Federal Environmental Agency) UBA - 99 205/12
Dimensions	L 385 / W 230 / H 430
Weight	7 kg (excl. battery)
